We have been having such fun together...

We went trail riding last fall. He just loves my horse Jay, but Jay would rather not get kissed on the nose! Sadly I must leave [Kota] in the trailer when I go out to ride because I can't trust other horses to [like dog] as [much as my horse does], but he stays in his crate in the A/C or heated trailer and is so happy when I get back.

Kota has learned to sit, wait, down, come, walk on the leash at heel, and even heels off leash. He can only "stay" so long as I can't get too far away (he just can't stand it) and has to come to me. He loves to go to the dog park and just run and run. He tries really hard to get the other dogs to run with him as he is not wrestler, but loves to run.

He has fit in so perfectly and those brown eyes just melt you...
