

January 16, 2007

Maggie has been with us for about 3 months now ... We spend much of the day on training walks and playing ball while practicing her sits, stays, downs, etc. She is not well behaved around other dogs so that is the major part of our work right now. She has made great progress in the past few weeks and is eager to please, most of the time! Still skeptical of humans coming into her home but warms up quickly and drops her ball or frisbee at their feet. ... She loves the snow and is not at all phased by the below zero temps we've had lately. She has learned how to catch a frisbee and now values it ALMOST as much as her balls! We attend a group training class every week and she is a star performer. ... Thanks for all of your hard work.
