

February 19, 2006

There are some really cute ones. Shania's Kong use to have 3 sections. She chewed the top off, so now when she's eaten all the goodies, it gets washed and goes up on the fridge where she can't get at it to destroy it. Same thing with her big round red ball with the cookie holes, and of course, tennis balls. The old dental kong I had is the only one she can't destroy--maybe it's atrophied or something!!!
